comprehensive overview of the field to date. It offers an accessible and authoritative introduction to a range of historical, disciplinary, methodological and cultural perspectives on business discourse and addresses many of the pressing issues facing a growing, varied and increasingly international field of research. The collection also illustrates some of the challenges of defining and delimiting a relatively recent and eclectic field of studies, including debates on the very definition of 'business discourse'. Part One includes chapters on the origins, advances and features of business discourse in Europe, North America, Australia and New Zealand. Part Two covers methodological approaches such as mediated communication, corpus linguistics, organisational discourse, multimodality, race and management communication, and rhetorical analysis. Part Three moves on to look at disciplinary perspectives such as sociology, pragmatics, gender studies, intercultural communication, linguistic anthropology and business communication. Part Four looks at cultural perspectives across a range of geographical areas including Spain, Brazil, Japan, Korea, China and Vietnam. The concluding section reflects on future developments in Europe, North America and Asia. This Handbook discusses the main issues, research, and theory on business and the natural environment, and how they impact on different business functions and disciplines. This text provides an introduction to the ways in which five different disciplines have approached the study of business and government. It examines how business interacts with government in different parts of the world, including the United States, the EU, China, Japan and South America. This comprehensive Handbook presents specially commissioned original essays on the societal roles and contexts facing women in business and management, the specific career and work life issues of women in these fields, organizational processes affecting women, and the role of women as leaders in business and management. The essays shed light on the extant structures and practices of society and organizations that constrain or facilitate women s representation, treatment, quality of life, and success. Despite decades of ongoing inquiry and increasing interest, research on women in business and management remains a specialized field without mainstream acceptance within business and management disciplines. The Handbook presents the current state of knowledge about women in business and management and specifies the directions for future research likely to be most constructive for advancing the representation, treatment, quality of life, and success of women who work in these fields. It provides the foundations for improved societal and organizational structures, policies,

and relational practices affecting all in business and management. Thus, by enhancing the knowledge base that improves the work and life situations of women, it suggests ways to elevate the societal and organizational systems for all. The Handbook will be an essential reference source for recent advances in research and theory, informing both scholars of organization studies, gender, diversity, and feminism; human resource specialists; and educators of and consultants to business organizations and management.
