Supporting Complex Cognitive Skills Oct 18 2019 The ability to interpret and apply cases is a skill that is a key to successful transferable learning. In this work, we make the following claim: If learners in project-based inquiry classes are able to understand, engage in, and carry out the processes involved in interpreting and applying cases effectively to their projects, they will not only learn those cases contents and lessons deeply and be able to apply those lessons later, but they may also be able to transfer interpretation and application skills to some other learning situations where application of cases is appropriate. This work seeks to understand and describe the path along which middle-school students in a project-based inquiry learning environment acquire and develop the skills needed to apply expert cases to solve science problems. We do this in the context of a system of scaffolds designed such that students will be scaffolded as cognitive apprenticeship suggests whether working individually, in groups, or as a class.

However, recent advances in the areas of remote, computer-assisted, and, most recently, machine interpreting, are gaining the interest of both researchers and practitioners. This volume aims at exploring key issues, approaches and challenges to the interplay of interpreting and technology, an area that is still underrepresented in the field of Interpreting Studies. Teaching Dialogue Interpreting Sep 28 2020 Teaching Dialogue Interpreting is one of the very few book-length contributions that cross the research-to-training boundary in dialogue interpreting. The volume is innovative in at least three ways. First, it brings together experts working in areas as diverse as business interpreting, court interpreting, medical interpreting, and interpreting for the media, who represent a wide range of theoretical and methodological approaches. Second, it addresses instructors and course designers in higher education, but may also be used for refresher courses and/or retraining of in-service interpreters and bilingual staff. Third, and most important, it provides a set of resources, which, while research driven, are also readily usable in the classroom – either together or separately – depending on specific training needs and/or research interests. The collection thus makes a significant contribution in curriculum design for interpreter education.

Building ASL Interpreting and Translation Skills Nov 11 2021 Written in a workbook fashion and designed as a teaching / learning vehicle, *Building ASL Interpreting and Translation Skills* is for students taking courses in American Sign Language (levels I, II or III), as well as students enrolled in interpreting programs. The written English narratives are designed for translation, interpreting and transliterating with over 80 examples on the companion DVD signed by both native Deaf individuals and nationally certified interpreters. The book is divided into four parts. Part I: The first part of the text consists of 24 chapters that provide readers with an overview of a variety of ASL grammatical features. Each chapter includes an example glossed into ASL to provide students with a model for translation, each of which are signed on the accompanying DVD, followed by narratives for student practice that gradually increase in length and difficulty. Part II The second part of the text consists of 20 chapters covering additional grammatical features. The selections become increasingly longer in length. Selections in the first several chapters of Part II are also signed by a Deaf individual on the companion DVD. As the selections become longer, a nationally certified interpreter interprets selected narratives modeling the ASL principle described in the chapter. Part III: The third part of the text is devoted to exercises that focus on building automaticity when confronting multiple meaning words, idioms, and college level vocabulary. These selections are longer in length and are designed to provide interpreters with source material that covers a wide variety of topics. Part IV: The fourth part of the text includes narratives, lectures, and passages from texts that might be read in a high school or college class. FEATURES OF THIS NEW TEXT: Part I & Part II include information on ASL grammatical features and provides readers with examples of how to gloss the selections. These examples are also demonstrated on the accompanying DVD as a visual aid to help future interpreters. Readers are taught how to work with multiple meaning words, idioms, and are provided with vocabulary building exercises. The workbook design allows students opportunity to compare what their written responses to the exercises with what they see on the accompanying DVD. Enclosed DVD allows students to see some of the narratives signed and interpreted and provides students with visual examples and role models of what the ASL principles look in action.

Aptitude for Interpreting Oct 30 2020 First published as a Special Issue of *Interpreting* (issue

10:1, 2011) and complemented with two articles published in *Interpreting* issue 16:1, 2014, this volume provides a comprehensive view of the challenge of identifying and measuring aptitude for interpreting. Following a broad review of the existing literature, the array of eight empirical papers captures the multiple dimensions of aptitude, from personality traits and soft skills such as motivation, anxiety and learning styles to aspects of cognitive performance. The populations studied, with experimental as well as survey research designs, include students and professionals of sign language interpreting as well as spoken-language interpreting, and valuable synergies emerge. While pointing to the need for much further work, the papers brought together in this volume clearly represent the cutting edge of research into aptitude for interpreting, and should prove a milestone on the way toward supplying educators with reliable methods for testing applicants to interpreter training programs.
