A number of metrics for assessing human thermal response to climatic conditions

have been proposed in scientific literature over the last decades. They aim at describing human thermal perception of the thermal environment to which an individual or a group of people is exposed. More recently, a new type of "discomfort index" has been proposed for describing, in a synthetic way, long-term phenomena. Starting from a systematic review of a number of long-term global discomfort indices, they are then contrasted and compared on a reference case study in order to identify their similarities and differences and strengths and weaknesses. Based on this analysis, a new short-term local discomfort index is proposed for the American Adaptive comfort model. Finally, a new and reliable long-term general discomfort index is presented. It is delivered in three versions and each of them is suitable to be respectively coupled with the Fanger, the European Adaptive and the American Adaptive comfort models. The Rough Guide to Australia is your indispensable guide to one of the most unmissable countries on earth. Packed with practical information on once-in-a-lifetime experiences in Oz, from sunrise walks around Uluru to viewing Kangaroo Island's wild seals, sea lions, kangaroos and koalas; bush-camping safaris in UNESCO World Heritage-listed Kakadu National Park to exhilarating helicopter flights down the dramatic gorges of Aboriginal-owned Nitmiluk National Park - not forgetting the stunning harbour side bars and restaurants of Sydney. Written by a team of widely-travelled, dedicated authors, this Rough Guide will help you to discover the best hotels, restaurants, cafes, shops and festivals around Australia, whatever your budget. Plus, you'll find expert background on Australia's history, wildlife, cinema and fascinating aboriginal culture and the clearest maps of any guide. They account for one third of energy consumption across the globe and represent an annual capital expenditure of 7%-10% of GNP in industrialized countries. Their lifetime operation costs can exceed capital investment. Building Engineering aims to make buildings more efficient, safe and economical. One

branch of this discipline, Building Physics/Science, has gained prominence, with a heightened awareness of such phenomena as sick buildings, the energy crisis and sustainability, and considering the performance of buildings in terms of climatic loads and indoor conditions. The book reflects the advanced level and high quality of research which Building Engineering, and Building Physics/Science in particular, have reached at the beginning of the twenty-first century. It will be a valuable resource to: engineers, architects, building scientists, consultants on the building envelope, researchers and graduate students. World-renowned 'tell it like it is' guidebook Discover Australia with this comprehensive, entertaining, 'tell it like it is' Rough Guide, packed with comprehensive practical information and our experts' honest and independent recommendations. Whether you plan to swim with whale sharks, explore the Atherton Tablelands or sail in the Whitsunday Islands, The Rough Guide to Australia will help you discover the best places to explore, sleep, eat, drink and shop along the way. Features of The Rough Guide to Australia: - Detailed regional coverage: provides in-depth practical information for each step of all kinds of trip, from intrepid off-the-beaten-track adventures, to chilled-out breaks in popular tourist areas. Regions covered include: Sydney and around, New South Wales and the ACT, Coastal Queensland, Outback

Queensland, Northern Territory, Western Australia, South Australia, Melbourne and around, Victoria, and Tasmania. - Honest independent reviews: written with Rough Guides' trademark blend of humour, honesty and expertise, and recommendations you can truly trust, our writers will help you get the most from your trip to Australia. - Meticulous mapping: always full-colour, with clearly numbered, colour-coded keys. Find your way around Sydney, Melbourne and many more locations without needing to get online. - Fabulous full-colour photography: features a richness of inspirational colour photography, including the captivating, rugged peaks of the Flinders Ranges and the stunning blue waters (and whale sharks!) of Ningaloo Marine Park. - Things not to miss: Rough Guides' rundown of Sydney, Brisbane, Perth and Adelaide's best sights and top experiences. - Itineraries: carefully planned routes will help you organise your trip, and inspire and inform your on-the-road experiences. - Basics section: packed with essential pre-departure information including getting there, getting around, accommodation, food and drink, health, the media, festivals, sports and outdoor activities, culture and etiquette, shopping and more. - Background information: comprehensive Contexts chapter provides fascinating insights into Australia, with coverage of history, religion, ethnic groups, environment, wildlife and books, plus a

handy language section and glossary. - Covers: Sydney and around, New South Wales and the ACT, Coastal Queensland, Outback Queensland, Northern Territory, Western Australia, South Australia, Melbourne and around, Victoria, and Tasmania. About Rough Guides: Rough Guides have been inspiring travellers for over 35 years, with over 30 million copies sold globally. Synonymous with practical travel tips, quality writing and a trustworthy 'tell it like it is' ethos, the Rough Guides list includes more than 260 travel guides to 120+ destinations, gift-books and phrasebooks. When used appropriately, building performance simulation has the potential to reduce the environmental impact of the built environment, to improve indoor quality and productivity, as well as to facilitate future innovation and technological progress in construction. Since publication of the first edition of Building Performance Simulation for Design and Operation, the discussion has shifted from a focus on software features to a new agenda, which centres on the effectiveness of building performance simulation in building life cycle processes. This new edition provides a unique and comprehensive overview of building performance simulation for the complete building life cycle from conception to demolition, and from a single building to district level. It contains new chapters on building information modelling, occupant behaviour modelling,

urban physics modelling, urban building energy modelling and renewable energy systems modelling. This new edition keeps the same chapter structure throughout including learning objectives, chapter summaries and assignments. Moreover, the book: • Provides unique insights into the techniques of building performance modelling and simulation and their application to performance-based design and operation of buildings and the systems which service them. • Provides readers with the essential concepts of computational support of performance-based design and operation. • Provides examples of how to use building simulation techniques for practical design, management and operation, their limitations and future direction. It is primarily intended for building and systems designers and operators, and postgraduate architectural, environmental or mechanical engineering students. Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology. The IBM® DB2® Analytics Accelerator Version 3.1 for IBM z/OS® (simply called Accelerator in this book) is a union of the IBM System z® quality of service and IBM Netezza® technology to accelerate complex queries in a DB2 for z/OS highly secure and available environment. Superior performance and

scalability with rapid appliance deployment provide an ideal solution for complex analysis. In this IBM Redbooks® publication, we provide technical decision-makers with a broad understanding of the benefits of Version 3.1 of the Accelerator's major new functions. We describe their installation and the advantages to existing analytical processes as measured in our test environment. We also describe the IBM zEnterprise® Analytics System 9700, a hybrid System z solution offering that is surrounded by a complete set of optional packs to enable customers to custom tailor the system to their unique needs..
