The UNIX-haters Handbook Aug 01 2021 This book is for all people who are forced to use UNIX. It is a humorous book--pure entertainment--that maintains that UNIX is a computer virus with a user interface. It features letters from the thousands posted on the Internet's "UNIX-Haters" mailing list. It is not a computer handbook, tutorial, or reference. It is a self-help book that will let readers know they are not alone.

Apache Spark Implementation on IBM z/OS Mar 28 2021 The term big data refers to extremely large sets of data that are analyzed to reveal insights, such as patterns, trends, and associations. The algorithms that analyze this data to provide these insights must extract value from a wide range of data sources, including business data and live, streaming, social media data. However, the real value of these insights comes from their timeliness. Rapid delivery of insights enables anyone (not only data scientists) to make effective decisions, applying deep intelligence to every enterprise application. Apache Spark is an integrated analytics framework and runtime to accelerate and simplify algorithm development, deployment, and realization of business insight from analytics. Apache Spark on IBM® z/OS® puts the open source engine, augmented with unique differentiated features, built specifically for data science, where big data resides. This IBM Redbooks® publication describes the installation and configuration of IBM z/OS Platform for Apache Spark for field teams and clients. Additionally, it includes examples of business analytics scenarios.

Contract Management Body of Knowledge® Jul 20 2020 The seventh edition of the CMBOK is now available for purchase in print at ncmahq.org and will soon be available for purchase as an eBook. Prospective CPCM examinees can still elect to take the CPCM exam aligned with the CMBOK® Sixth Edition through December 31, 2023. The must-have reference for contract management professionals, based on the National Contract Management Association's internationally recognized third party standard. The Contract Management Body of Knowledge® (CMBOK®) explains the seven core competencies that serve as essential building blocks for successful contracting practitioners and leaders: 1. Leadership 2. Management 3. Guiding Principles 4. Pre-Award 5. Award 6. Post-Award 7. Learn NCMA is proud to announce the publication of the Sixth Edition of the CMBOK®. This update is driven by the changes in the Second Edition of the Contract Management Standard™, which serves as the CMBOK's foundation. The CMBOK® Sixth Edition provides a common understanding of the terminology, practices, policies, and processes used in contract management.

User's Guide to Natural Gas Technologies Jan 18 2023 Compiled & Edited by F. William Payne. Natural gas technologies that were new five years ago have now been tested in the real world. This book describes some of these important technologies, covering both new engineering concepts and new products which have emerged, as well as important innovations to existing technologies. Many of the chapters include economic analyses which identify the resulting cost savings. Specific areas of development addressed include gas cooling, chillers, desiccant technologies, cogeneration, heating systems, and other natural gas technologies.

First to the Party Oct 11 2019 What determines the interests, ideologies, and alliances that make up political parties? In its entire history, the United States has had only a handful of party transformations. First to the Party concludes that groups like unions and churches, not voters or politicians, are the most consistent influences on party transformation.

San Diego Magazine Jan 14 2020 San Diego Magazine gives readers the insider information they need to experience San Diego--from the best places to dine and travel to the politics and people that shape the region. This is the magazine for San Diegans with a need to know.

Water ecosystem services Oct 23 2020 "This comprehensive volume describes how ecosystem services-based approaches can assist in addressing major global and regional water challenges, such as climate change, biodiversity loss, and water security in the developing world, by integrating scientific knowledge from different disciplines, such as hydrological modelling, environmental economics, psychology and international law. Empirical assessments at the national, catchment and regional levels are used to critically appraise this systemic approach, and the merits and potential limitations are presented. The practicalities of this approach with regard to water resources management, nature conservation, and sustainable business practices are discussed, and the role of society in underpinning the concept of ecosystem services is explored. Presenting new insights and perspectives on how to shape future strategies, this contributory volume is a valuable reference for researchers, academics, students and policy makers, in environmental studies, hydrology, water resource management, ecology, environmental law, policy and economics, and conservation biology." -- Provided by publisher.
