The Middle East is often portrayed as oppressively patriarchal and homophobic. Yet, in recent years the region has become a vibrant and important arena for feminist and LGBTQ activism. This book provides an insight into this emerging politics through a unique analysis of feminist and LGBTQ social movements in the context of Lebanon's postwar sectarian system. *Resisting Sectarianism* argues that LGBTQ and feminist social movements are powerful agents of political and social transformation in Lebanon. Drawing on extensive ethnographic fieldwork, the book takes the reader inside these movements to see how they attract members and construct campaigns, forge alliances, and the multiple ways in which they generate important forms of resistance to, and change within, the sectarian system. The book also traces the strong obstacles that sectarian parties and religious authorities employ to weaken LGBTQ and feminist activism. In this warm and

affectionate book, William Zinsser describes his lifelong love affair with American popular song and the American musical theater. Provides hundreds of market listings, including music publishers, record companies, and producers, as well as key advice on how to market work for future sales, online resources, and interviews with songwriters. This book is the first to tackle the difficult and complex politics of transition in Zimbabwe, with deep historical analysis. Its focus is on a very problematic political culture that is proving very hard to transcend. At the center of this culture is an unstable but resilient 'nationalist-military' alliance crafted during the anti-colonial liberation struggle in the 1970s. Inevitably, violence, misogyny and masculinity are constitutive of the political culture. Economically speaking, the culture is that of a bureaucratic, parasitic, primitive accumulation and corruption, which include invasion and emptying of state coffers by a self-styled

'Chimurenga aristocracy.'
However, this Chimurenga aristocracy is not cohesive, as the politics that led to Robert Mugabe's ousting from power was preceded by dirty and protracted internal factionalism. At the center of the factional politics was the 'first family': Robert Mugabe and his wife, Grace Mugabe. This book offers a multidisciplinary examination of the complex contemporary politics in Zimbabwe, taking seriously such issues as gender, misogyny, militarism, violence, media, identity, modes of accumulation, the ethnicization of politics, attempts to open lines of credit and FDI, national healing, and the national question as key variables not only of a complete political culture but also of difficult transitional politics. This new study looks at the different traditions they represent, and most notably the balance in the tension of the Song of Songs as oral and written, carnal and spiritual. The introduction presents a historical and theoretical discussion of Canticles, using a

Rabbinic model for juxtaposing orality and textuality; the author goes on to argue that from the time of ancient Sumer through medieval England motifs found in the Song of Songs are simultaneously sexual and spiritual just as they are likewise oral and textual. By attempting to recover oral approaches to any text, we encounter a series of forces that act to balance an open, oral, and sexual understanding of the erotic biblical text against a more closed, textual and spiritual reading. This balance is then traced through works by Baldwin, Spenser, Ayllett, Coppe, Clarkson and Milton. NOAM FLINKER is currently Chairperson at the Department of English, University of Haifa. The companion book to the groundbreaking PBS and BBC documentary series celebrating the pioneers and artists of American roots music—blues, gospel, folk, Cajun, Appalachian, Hawaiian, Native American—without which there would be no jazz, rock, country R&B, or hip hop today. Jack White, T. Bone Burnett, and Robert Redford have teamed up to executive produce American Epic, a historical music project exploring the pivotal recording journeys of the early twentieth century, which for the first time captured the breadth of American music and made it available to the world. It was, in a very real way, the first time America truly heard herself. In the 1920s and 1930s, as radio took over the pop music business, record companies were forced to leave their studios in major cities in

search of new styles and markets. Ranging the mountains, prairies, rural villages, and urban ghettos of America, they discovered a wealth of unexpected talent—farmers, laborers, and ethnic minorities playing styles that blended the intertwining strands of Europe, Africa, Asia, and the Americas. These recordings form the bedrock for modern music as we know it, but during the Depression many record companies went out of business and more than ninety percent of the fragile 78 rpm discs were destroyed. Fortunately, thanks to the continuing efforts of cultural detectives and record devotees, the stories of America's earliest musicians can finally be told. Bernard MacMahon and Allison McGourty, who directed and produced the documentary with American musician Duke Erikson, spent years traveling around the US in search of recollections of those musical pioneers. Their fascinating account, written with the assistance of prize-winning author Elijah Wald, continues

the journey of the series and features additional stories, never-before-seen photographs, and unearthed artwork. It also contains contributions from many of the musicians who participated including Taj Mahal, Nas, Willie Nelson, and Steve Martin, plus a behind-the-scenes look at the incredible journey across America. American Epic is an extraordinary testament to our country's musical roots, the transformation of our culture, and the artists who gave us modern popular music. "In this study in 'musical archeology,' James McKinnon reveals one of the most important layers in the early development of Gregorian chant. With equal attention to musical and ritual practicalities, McKinnon applies an unusual combination of scholarly skill and sensitivity to reconstruct how words and melodies might have been assigned to the whole church year, beginning with Advent. If liturgy is 'people doing things for which they have forgotten the reasons,' McKinnon shows

us some of the reasons for the creation of the Gregorian Proper chants of the mass."—Richard Crocker, author of *An Introduction to Gregorian Chant* "[It] is so richly imagined and so well supported with facts and argument that the reader is compelled by its plausibility even while remembering that (s)he is peering behind what has often been depicted as an impenetrable curtain. McKinnon uses his exceptional knowledge of the sources of late antiquity, common sense, imagination and persistent belief that the story ought to make sense to piece together the history of Christian chant from 200 to 800 as one might piece together the shards of a hopelessly smashed ancient artifact. The results are simply stunning."—Edward Nowacki, University of Cincinnati "Simply one of the half-dozen most important works of chant scholarship in the entire twentieth century. The scholarship in the book is not just superior. It borders on the inspired."—Alejandro

Readers will get a taste of life on the border from the perspective of a young woman of color struggling to write herself into existence. These poems introduce a unique new transcultural feminist viewpoint as the poems call for social and political change along the borderlands. Ortiz,

an award-winning performance poet known for her dynamic delivery style, relinquishes control of her writing to the reader, but not without first imparting the theatrical stage directions stated in the book's title, which commands readers to recite these poems aloud in a spoken word celebration exploring culture, music, and place while encouraging the reader to embrace diversity and find their own storytelling voice. How does the way in which a democratic polity mourn its losses shape its political outcomes? How might it shape those outcomes? *American Mourning: Tragedy, Democracy, Resilience* answers these questions with a critical study of American public mourning. Employing mourning as a lens through which to view the shortcomings of American democracy, it offers an argument for a tragic, complex, and critical mode of mourning that it contrasts with the nationalist, romantic, and nostalgic responses to loss that currently dominate and damage the polity. Offering

new readings of key texts in Ancient political thought and American political history, it engages debates central to contemporary democratic theory concerned with agonism, acknowledgment, hope, humanism, patriotism, and political resilience. The book outlines new ways of thinking about and responding to terrorism, racial conflict, and the problems of democratic military return. Seminar paper from the year 2020 in the subject English Language and Literature Studies - Culture and Applied Geography, grade: 1,0, University of Freiburg (Anglistik), language: English, abstract: In this paper, I will analyze how the relationship between black people and the police is represented in hip hop music, more precisely rap music. For that reason, I chose two important songs in hip hop history which discuss this exact issue and therefore function as a representation of their particular time. In the theoretical part, I will give a short overview of the

development of hip hop for a better understanding of the genre. After that, I will elucidate how representation in hip hop functions and which theory it refers to. In the practical part, I will analyze the two songs, Fuck Tha Police by N.W.A from 1988 and Alright by Kendrick Lamar from 2015, since both are important representatives of hip hop of their individual point in time. After the analysis, I will work out the differences and similarities in the representation of the relationship between black people and the police and finally draw my conclusion. This edited collection considers whether it is possible to discern how the level of ideology is affected by radicalization. In other words: what happens in the minds of people before they decide to use political violence as means to attain their goals? Also this book asks: what has to happen in the minds of people in order to preclude them from using political violence as a way of attaining their goals? This

volume unites scholars from several disciplines and perspectives from a number of different geographical, social and cultural contexts with the overarching aim to refine our understanding of what 'radicalization' actually implies. Football in Central-Eastern and Eastern Europe has long functioned as a carrier of the three "non-normal" socio-political drivers that were effective below the surface of modernity, including the official self-image of European political systems, since the second half of the 20th century: Tribal Politics, Imaginal Politics, and Contextual Politics. All three are trends that are currently surfacing prominently on an international and global level. Long before the return of the now proverbial "Political Tribes" by the means of populisms and neo-authoritarianisms in societies around the world, football in Central-Eastern and Eastern Europe worked as a subconscious vehicle of group instincts and political moods

that represented, mirrored, informed and influenced political behavior and governmental decisions both in the post-WWII communist and then, after 1989, the neo-capitalist societies located east of the former iron curtain. Football has always been used by both governments and their opponents, including the dissident civil society, to further coherence and to symbolically represent specific readings of power relations, system ideologies and history. Football in Central and Eastern Europe was always able to attract and include large parts of the population, inducing them to symbolically express protest against the government or to sustain the "politics from above". Through football politics, aspects of the area's specific political mechanisms are introduced and explained. A study of postmodernism and African-American poets. Music: From Sound to
Significance* (2nd edition), the
authors consider music on a
broad scale, from its beginning
as an acoustical signal to its
different manifestations across
cultures. In their second
edition, the authors apply the
same richness of depth and
scope that was a hallmark of
the first edition of this text. In
addition, having laid out the
topography of the field in the
original book, the second
edition puts greater emphasis
on linking academic learning to
real-world contexts, and on
including compelling topics
that appeal to students' natural
curiosity. Chapters have been
updated with approximately
500 new citations to reflect
advances in the field. The
organization of the book
remains the same as the first
edition, while chapters have
been updated and often
expanded with new topics.
'Part I: Foundations' explores
the acoustics of sound, the
auditory system, and responses
to music in the brain. 'Part II:

The Perception and Cognition of Music' focuses on how we process pitch, melody, meter, rhythm, and musical structure. 'Part III: Development, Learning, and Performance' describes how musical capacities and skills unfold, beginning before birth and extending to the advanced and expert musician. And finally, 'Part IV: The Meaning and Significance of Music' explores social, emotional, philosophical and cultural dimensions of music and meaning. This book will be invaluable to undergraduates and postgraduate students in psychology and music, and will appeal to anyone who is interested in the vital and expanding field of psychology of music. The fourth chapter of an ongoing poetic journey, which began with "Shattered Images", and continued with "The Problem With Revolution", and "Sooner or Later, They'll Turn on You!" As Karl Marx famously said: "The Road to Hell is paved with good intentions." Indeed, quite often, over time, the best of

intentions eventually yield the most repugnant of results, such as the unfortunate tendency for many progressive social movements to eventually mutate into little more than crude instruments of revenge... Developing regions are set to account for the vast majority of future urban growth, and women and girls will become the majority inhabitants of these locations in the Global South. This is one of the first books to detail the challenges facing poorer segments of the female population who commonly reside in 'slums'. It explores the variegated disadvantages of urban poverty and slum-dwelling from a gender perspective. This book revolves around conceptualisation of the 'gender-urban-slum interface' which explains key elements to understanding women's experiences in slum environments. It has a specific focus on the ways in which gender inequalities are can be entrenched but also alleviated. Included is a review of the demographic factors which are

increasingly making cities everywhere 'feminised spaces', such as increased rural-urban migration among women, demographic ageing, and rising proportions of female-headed households in urban areas. Discussions focus in particular on education, paid and unpaid work, access to land, property and urban services, violence, intra-urban mobility, and political participation and representation. This book will be of use to researchers and professionals concerned with gender and development, urbanisation and rural-urban migration. In *Gregorian Chant and the Carolingians*, Levy seeks to change long-held perceptions about certain crucial stages of the evolution and dissemination of the old corpus of plainchant most notably the assumption that such a large and complex repertory could have become and remained fixed for over a century while still an oral tradition. This UN Women's flagship report shows that, all too often, women's economic and social rights are held back,

because they are forced to fit into a 'man's world'. But, it is possible to move beyond the status quo, to picture a world where economies are built with women's rights at their heart. It is being published as the international community comes together to define a transformative post-2015 development agenda, and coincides with the 20th anniversary commemoration of the landmark Fourth World Conference on Women in Beijing, China which set out a comprehensive agenda to advance gender equality. This publication brings together human rights and economic policymaking, and provides the key elements for a far-reaching new policy agenda that can transform economies and make women's rights a reality. Through solid in-depth analysis and data, this evidence-based report provides key recommendations on moving towards an economy that truly works for women, for the benefit of all. 2015 Reprint of 1916 Edition. A weaver by trade and a mystic by nature, the 15-century poet Kabir created timeless works of enlightenment that combine the philosophies of Sufism, Hinduism, and the Kabbala. Expressed in imagery drawn from common life and the universal experience, Kabir's poems possess an appealing simplicity. This collection of 100 songs reflects nearly every aspect of the mystic's thought and emotions: ecstasy and despair, tranquil beatitude and fervid illumination, and moments of intimate love. The acclaimed translation is by Rabindranath Tagore, a popular Indian poet and Nobel laureate and assisted by Evelyn Underhill, well known English mystic and author. This book discusses the relationship between Greek Orthodox ecclesiastical music and laiko (popular) song in Greece. Laiko music was long considered a lesser form of music in Greece,

with rural folk music considered serious enough to carry the weight of the ideologies founded within the establishment of the contemporary Greek state. During the 1940s and 1950s, a selective exoneration of urban popular music took place, one of its most popular cases being the originating relationships between two extremely popular musical pieces: Vasilis Tsitsanis's *Συννεφιασμενη Κυριακι* (Cloudy Sunday) and its descent from the hymn *Τι Υπερμαχο* (The Akathist Hymn). During this period the connection of these two pieces was forged in the Modern Greek conscience, led by certain key figures in the authority system of the scholarly world. Through analysis of these pieces and the surrounding contexts, Ordoulidis explores the changing role and perception of popular music in Greece. This new collection of top 40 songs for global warming days and internet nights will have you humming along on the information superhighway to

man's ruin. Read it like poetry or add your own music, *Love Songs For A World Gone Wrong* by Blake Wiers (The Barbary Coast Revue, Miller's High Life) is the perfect accompaniment to a tall glass of wine and a stiff helping of humility. This book traces the mobilization process leading up to the January 25 Uprising, and furthers our understanding of the largely unexpected diffusion of protest during this Egyptian Revolution. Focusing on the role of the so-called "Cairo-based political opposition," this study strongly suggests a need to pay closer attention to the complexity and contingent nature of such large-scale protest episodes. Building on interviews with activists, employees of NGOs in the human rights advocacy sector, and journalists, this in-depth single case study reveals how different movement organizations in the Egyptian prodemocracy movement had long, and largely unsuccessfully, tried to mobilize support for socio-political change in the country.

Against this backdrop, the book illustrates how a coalition of activists sought to organize a protest event against police brutality in early 2011. The resulting protests on January 25 surprised not only the regime of Hosni Mubarak, but also the organizers. "College" is a word that means many things to many people: a space for knowledge, a place to gain lifelong friends, and an opportunity to transcend one's socioeconomic station. Today, though, this word also recalls a slew of headlines that have revealed a dark and persistent world of racial politics on campus. Does this association disturb our idealized visions of what happens behind the ivied walls of higher learning? It should—because campus racism on college campuses is as American as college football on Fall Saturdays. From Lawrence Ross, author of *The Divine Nine* and the leading expert on sororities and fraternities, *Blackballed* is an explosive and controversial book that rips the veil off America's hidden secret: America's colleges have

fostered a racist environment that makes them a hostile space for African American students. *Blackballed* exposes the white fraternity and sorority system, with traditions of racist parties, songs, and assaults on black students; and the universities themselves, who name campus buildings after racist men and women. It also takes a deep dive into anti-affirmative action policies, and how they effectively segregate predominately white universities, providing ample room for white privilege. A bold mix of history and the current climate, *Blackballed* is a call to action for universities to make radical changes to their policies and standards to foster a better legacy for all students. Barry Vincent was both a Love Child of the 1960s & a Soul Brother. In this colorful book you get plenty of the idealism of the flower-power love generation, and also the self-righteous indignation of proud black nationalism. There are many feelings that can't be expressed in words but music is the

perfect medium to get the listener involved. This is a reason that there are so many performance instructions which are actually moods and attitudes. Music allows you to capture a feeling, document a time and place, paint a picture - sometimes better than the visual arts. Music is a language that sometimes says things that words simply can't communicate. Make your experience eternal by writing it down. Let us thank those that have upheld traditions, carried on culture, language, forms and feelings that would have otherwise been neglected, and sometimes even sadly lost forever. Barry shares the optimism of the Flower Power era and the consciousness of the Civil Rights movement in beautiful songs and positive stories and sounds. Does Scotland have a problem with racism? With its 'civic nationalism' and 'welcoming' attitude towards migrants and refugees, Scotland is understood to be relatively free of structural and institutional racism. As the contributors to

this book show, such generalisations fail to withstand serious investigation. Their research into the historical record and contemporary reality tells a very different story. Opening up a debate on a subject that has been shut down for too long, *No Problem Here* gathers together the views of academics, activists and anti-racism campaigners who argue that it is vital that the issue of racism be brought into the centre of public discourse. Scotland's role in maintaining and extending slavery across the British Empire is finally beginning to receive the attention it deserves. Yet there is much more that needs to be said about racism in Scotland today. *Gateways to Understanding Music* explores music in all the categories that constitute contemporary musical experience: European classical music, popular music, jazz, and world music. Covering the oldest forms of human music making to the newest, the chronological narrative considers music from

a global rather than a Eurocentric perspective. Each of sixty modular "gateways" covers a particular genre, style, or period of music. Every gateway opens with a guided listening example that unlocks a world of music through careful study of its structural elements. Based on their listening experience, students are asked to consider how the piece came to be composed or performed, how the piece or performance responded to the social and cultural issues at the time and place of its creation, and what that music means today. Students learn to listen to, explain, understand, and ultimately value all the music they may encounter in their world. **FEATURES** Global scope—Presents all music as worthy of study, including classical, world, popular, and jazz. Historical narrative—Begins with small-scale forager societies up to the present, with a shifting focus from global to European to American influences. Modular framework—60 gateways in 14 chapters allow

flexibility to organize chronologically or by the seven recurring themes: aesthetics, emotion, social life, links to culture, politics, economics, and technology. Listening-guided learning—Leads to understanding the emotion, meaning, significance, and history of music. Introduction of musical concepts—Defined as needed and compiled into a Glossary for reference. Consistent structure—With the same step-by-step format, students learn through repeated practice how to listen and how to think about music. In addition to streamed audio examples, the companion website hosts essential instructors' resources. Music and Liturgy, Identity and Formation is a one-of-a-kind book about All Saints Moda Church in Istanbul. In this book, Sue Whittaker explores the ways Dr. Turgay Ücal, the MBB founding pastor, has intuitively blended Christian faith and the local urban culture. Indigenous songs and adaptations of Reformed liturgy work together to enable

worshipers to feel comfortable with Christianity. Images, customs, and gestures guide seekers into new ways to pray and live their lives. Turgay's theologically sound approach provides a welcoming Christian home for Muslims searching to connect to Allah/God. For thirty years, the practices and strategies detailed in this book have merged to clearly present the gospel message in culturally appropriate ways. The principles of the All Saints Moda Church model of inculturation can be applied to Christian ministry among Muslims in all countries and cultures worldwide. As seen in Time, USA TODAY, The Atlantic, The Wall Street Journal, and on CBS This Morning, BBC, PBS, CNN, and NPR, iGen is crucial reading to understand how the children, teens, and young adults born in the mid-1990s and later are vastly different from their Millennial predecessors, and from any other generation. With generational divides wider than ever, parents, educators, and employers have

an urgent need to understand today's rising generation of teens and young adults. Born in the mid-1990s up to the mid-2000s, iGen is the first generation to spend their entire adolescence in the age of the smartphone. With social media and texting replacing other activities, iGen spends less time with their friends in person—perhaps contributing to their unprecedented levels of anxiety, depression, and loneliness. But technology is not the only thing that makes iGen distinct from every generation before them; they are also different in how they spend their time, how they behave, and in their attitudes toward religion, sexuality, and politics. They socialize in completely new ways, reject once sacred social taboos, and want different things from their lives and careers. More than previous generations, they are obsessed with safety, focused on tolerance, and have no patience for inequality. With the first members of iGen just graduating from college, we all need to understand them:

friends and family need to look out for them; businesses must figure out how to recruit them and sell to them; colleges and universities must know how to educate and guide them. And members of iGen also need to understand themselves as they communicate with their elders and explain their views to their older peers. Because where iGen goes, so goes our nation—and the world. "The liturgical chant that was sung in the churches of Southern Italy between the ninth and the thirteenth centuries reflects the multiculturalism of a territory in which Roman, Franks, Lombards, Byzantines, Normans, Jews, and Muslims were present at various times and with different political roles. This book examines a specific genre, the prosulas that were composed to embellish and expand pre-existing liturgical chants of the liturgy of mass. Widespread in medieval Europe, prosulas were highly cultivated in southern Italy, especially by the nuns, monks, and clerics of the city of Benevento. They

shed light on the creativity of local cantors to provide new meanings to the liturgy in accordance with contemporary waves of religious spirituality and to experiment with a novel musical style in which a syllabic setting is paired with the free-flowing melody of the parent chant. In their representing an epistemological 'beyond' and because of their interconnectedness with the parent chant, they can be likened to modern hypertexts. The emphasis on universal saints of ancient lineage stressed the perceived links with the cradles of Christianity, Africa and the Levant, and the centre of the Papal power, Rome, while the high number of Christological prosulas in manuscripts used in nunneries might be tied to the devotion to Jesus as 'spiritual spouse' that was typical of female religiosity. Full edition of texts, melodies, and manuscript facsimiles in the companion website enrich the study of the stylistic features and the cultural components of this

fascinating genre"-- This Handbook provides a comprehensive overview of British Romantic literature and an authoritative guide to all aspects of the movement including its historical, cultural, and intellectual contexts, and its connections with the literature and thought of other countries. All the major Romantic writers are covered alongside lesser known writers.
