Infortunios de Alonso Ramírez: Descríbelos

Until the modern period, the reproduction of written texts required manual transcription from earlier versions. This cumbersome process inevitably created errors and made it increasingly difficult to identify the original readings among multiple copies. Lachmann's method—associated with German classicist Karl Lachmann (1793-1851)—aimed to provide scholars with a scientific, systematic procedure to standardize the transmission of ancient texts. Although these guidelines for analysis were frequently challenged, they retained a paradigmatic value in philology for many years. In 1963, Italian philologist Sebastiano Timpanaro became the first to analyze in depth the history and limits of Lachmann's widely established theory with his publication, *La genesi del metodo del Lachmann*. This important work, which brought Timpanaro international repute, now appears in its first English translation. *The Genesis of Lachmann's Method* examines the origin, development, and validity of Lachmann's model as well as its association with Lachmann himself. It remains a fundamental work on the history and methods of philology, and Glenn W. Most's translation makes this seminal study available to an English-speaking audience. Revealing Timpanaro's extraordinary talent as a textual critic and world-class scholar, this book will be indispensable to classicists, textual critics, biblical scholars, historians of science, and literary theorists. This Elibron Classics title is a reprint of the original edition published by the Clarendon Press in

Oxford, 1898. Rose is a princess, a Cinder, and half-human. She is the last one born of her kind, and on her twenty-first birthday, she must enter the woods and travel to find her Prince, as her sisters did before her. ". . . And we will all dance at the Grand Ball," her sisters would always say. But the Human servants are keeping a secret that could prevent the Cinders from reaching their Happily Ever After....Hidden in Rose's dreams and vision are the answers of the past between Cinders and Humans, and she is quickly running out of time trying to solve their hidden messages. She knows the answer lies in her first clue--identifying an animal she has never seen before--that persistent vision of a furry white animal, holding a gold metal object and exclaiming, "Oh dear! Oh dear! I shall be too late!" This textbook aims to ensure that advances in medical textiles are addressed and that recent developments are able to be appreciated and understood not only by medical practitioners and healthcare personnel but also by textile scientists and technologists. The idea is to stimulate collaborative research and development in the field of medical textiles and to equip researchers with an understanding of the steps they need to take to ensure that their efforts, be they to develop new devices for implantation or items for external application, are carried out in such a way as to improve their effectiveness and enhance the prospects for their implementation. Attention is drawn to the need to improve outcomes in the practical setting and to guidance on the detailed planning required prior to engaging in experimental work. Standard tests can help researchers to monitor performance, but for some important applications such as those required to demonstrate antimicrobial and fluid-repellent performance in most items of protective wear, standard tests consistently fall seriously short in terms of predicting how well they might work in the practical setting. Guidance is therefore given for their further development. Chapters within the textbook cover: The history of innovation within medical textiles with particular attention given to key concepts of the latter part of the 19th Century and subsequent associated developments. Textile and polymer science underpinning fibres, fabrics, nano-fibre technology and the functional finishes that can be applied to enhance the performance of medical textile products. Woven, knitted, nonwoven and braided fabrics and the key performance characteristics of each fabric type which make them particularly suited to specific medical textile roles such as mesh, grafts, filtration and scaffolds for tissue engineering. Implantable medical textiles, non-implantable medical textiles, health and hygiene products and extracorporeal devices that use textile products. Legislative requirements for medical devices. The design of experiments and suitability for purpose of textile test methods. Case studies to illustrate how medical textiles are applied in practice. The book provides essential reading for textile professionals, biomedical engineers, and others involved in the research, design and engineering of medical and healthcare appliances, and for those employed in the medical profession wishing to gain new insights into the wealth of materials at their disposal. Sebastian Münster's *Cosmographia* was an immensely influential book that attempted to describe the entire world across all of human history and analyse its constituent elements of geography, history, ethnography, zoology and botany. First published in 1544 it went through thirty-

five editions and was published in five languages, making it one of the most important books of the Reformation period. Beginning with a biographical study of Sebastian Münster, his life and the range of his scholarly work, this book then moves on to discuss the genre of cosmography. The bulk of the book, however, deals with the *Cosmographia* itself, offering a close reading of the 1550 Latin edition (the last and definitive edition worked upon by Münster). By analysing the contents of the *Cosmographia* it attempts to recreate how the world of the sixteenth century appeared to a scholar living in Basel, and understand what he saw and heard. Through this examination of Münster, his publications and scholarly networks, the conflicts and continuities between medieval scholarly traditions and the widening horizons of the sixteenth century are explored and revealed. Of interest to scholars of humanist culture, the Reformation and book history, this ambitious work throws into relief previously overlooked aspects of the intellectual and religious culture of the time.

"Selections from the Speeches and Writings of Edmund Burke" by Edmund Burke. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten—or yet undiscovered gems—of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format. The first volume of *Roman Questions* appeared in 1995 and was received very positively by the scholarly community. The present collection contains 71 papers written mostly in English (with one paper in German and one in Latin) and predominantly published in the last 20 years in various leading journals in Europe and America. They are all reset, and supplied with addenda. There are also 5 inedita, and addenda to the previous volume. They deal with Roman republican and imperial history and constitutional law, prosopography, epigraphy, Latin philology, Roman religion, and the history of classical scholarship. They ask questions, try to answer them, and do not avoid polemic. They uphold the unity of *Altertumswissenschaft*: history cannot be understood without philology, and philology is blind without history; and history, law and literature are infused with ideology and religion. And the tool to knowledge is the painstaking linguistic dissection of texts. ""This book contains a careful, thorough, and where necessary skeptical as regards doubtful evidence (especially in the case of Plato and the Old Academy) of the beginnings in European thought of the negative or apophatic way of thinking and its relations to more positive or kataphatic ways of thinking about God. One of its greatest strengths, perhaps the greatest, is that the author makes clear that none of the persons concerned, Hellenic, Jewish or Christian, was engaged in the pursuit of a philosophical abstraction, or the heaping of rhetorical superlatives on God. They were rather concerned to present the origin of the universe as an intimately present living reality which infinitely transcends our thought and speech. This, combined with careful attention to the varieties of negative theology and its relations with positive, and the particular difficulties experienced by the members of the various

traditions involved, makes the book the best introduction to the negative theology available." -A. H. Armstrong, Emeritus Professor of Greek, University of Liverpool, England. Emeritus Professor of Classics, Dalhousie University, Halifax, Nova Scotia, Canada. Senior Fellow of the British Academy. Irish academic Deirdre Carabine has lived and taught in Uganda for more than twenty years. She has recently been founder Vice-Chancellor at the Virtual University of Uganda (VUU), the first fully online university in Sub-Saharan Africa. Prior to that she set up International Health Sciences University in Kampala. She has taught at Queen's Belfast, University College Dublin, and Uganda Martyrs University. Currently, she is Director of Programmes at VUU. She attended the Queen's University of Belfast where she graduated with a PhD in philosophy, and University College Dublin where, as one of the first Newman Scholars, she gained a second PhD in Classics. She is also author of *John Scottus Eriugena in the Great Medieval Thinkers Series* (2000). Chinese practices related to ancestors have long been the subject of conflicting interpretations. These practices are rooted in the lived experience of practitioners, and therefore need to be considered as embodied expressions of the quest for existential meaning. For practitioners, the achievement of existential meaning requires the inclusion, implication, and mediation of the ancestors. When gestures in ancestor rites are analyzed from this perspective it is possible to appreciate their essence as constitutive of "ancestor religion." This book uses an inquisitive method that investigates the discrepancies between foreign and local explanations, and proposes another hermeneutic framework for ancestor related praxes. Sozomen, a native of Palestine, was a Church historian who lived in the 5th century A.D. His *Ecclesiastical History* consists of nine books, which roughly coincide with the reign of Roman emperors. This is a seven volume treatise on historical dating and scientific arguments regarding the truth or falsehoods in currently accepted historical concepts. It claims the 16th century as the time during which history was created by medieval scribes and cemented by the power of the ecclesial authorities. It is theorized for example that Jesus was actually born in 1053 A.D. and crucified in 1086 A.D.; the Old Testament refers to medieval events and the Apocalypse was written after 1486 A.D. Originally published in 1899. Author: F. Max Muller, K.M. Language: English Keywords: Language Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. Obscure Press are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork. A Karger 'Publishing Highlights 1890-2015' title This 2nd, revised edition is still the reference work available in print and electronically on Paracelsus by the Paracelsus authority. Furthermore, it makes a very good read. See also Pagel's last book *The Smiling Spleen on Paracelsianism as a historical phenomenon*. '...a work in the brilliant tradition of biographical research ... even the casual reader will be impressed to learn that, four centuries ago, the man who had the courage to burn in public the writings of Avicenna, recognised pulmonary disease in miners as an occupational hazard, cretinism and goitre as endemic in certain areas, and chorea and hysteria as manifestations of disease, not demonic possession.' The

Lancet Featuring a collection of essays by leading experts, *Female Sexual Offenders: Theory, Assessment and Treatment* is the first book to bring together current research, clinical assessment, and treatment techniques of female sexual offenders into one accessible volume. Describes the most recent research data regarding female sexual offenders, covering such issues as female-perpetrated sexual abuse prevalence and juvenile offenders. Includes an assessment of the risk of recidivism, international treatment initiatives, and a discussion on the use of the polygraph with female sexual offenders. Features practitioner-focused essays which evaluate current assessment strategies, treatment needs, effectiveness, and processes for female sexual offenders. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant. This book's concern is with notoriously obscure ancient poets-riddlers, whom it argues to have been an essential, albeit necessarily marginal, element of the literary landscape of Antiquity, which, in addition, exerted subtle yet lasting influence on European culture. The three first essays in this book trace a direct line of influence between the early Hellenistic scholar-poet Simias of Rhodes, the late Republican Roman experimentalist Laevius and Constantine the Great's virtuoso panegyrist Optatian Porphyry, whereas the fourth essay discusses the preservation and transformation of the model invented by Simias in Byzantium. The Appendix reflects on the triumph of this intellectual paradigm in Neo-Latin Jesuit education by investigating the case of a peripheral yet highly influential Central European college at the turn of the sixteenth and seventeenth centuries. This book is at once a contribution to the scholarship on the reception of Hellenistic poetry and to the study of ancient "technopaegnia" (i.e. playful poetry) and their cultural influence in Antiquity, Byzantium and post-mediaeval Europe. 'This cutting-edge publication is drawn on international research and practice, and undoubtedly encourages reflection and personal development. The authors are experts in the field of education leadership and management.' - Professor Raj Mestry, University of Johannesburg

The Third Edition of this successful and respected book covers leadership and management of people at all levels in educational organisations. It contains up-to-date research and literature, covering the entire spectrum of educational institutions. This new and revised edition: deals with issues such as succession

planning, leadership development and diversity has an enhanced focus on international trends, examples and research acknowledges the changing English context, including the shift to system leadership, academies and free schools covers changes in Scotland, Wales and Northern Ireland The book will be of great interest to postgraduate students, researchers and academics; candidates on professional leadership qualifications; middle and senior managers, and aspiring leaders in schools and colleges. Tony Bush is Professor of Educational Leadership at the University of Warwick, UK and Visiting Professor at the University of the Witwatersrand, South Africa. David Middlewood is a Research Fellow at The University of Warwick. A study of the philosophical and theological thought of Henry Cornelius Agrippa of Nettesheim (1486-1535). It contains new perspectives on Agrippa's place in the world of humanism and offers a new approach to the interpretation of Renaissance declamations.
