Leadership: Leaders, Followers, Environments (Second Edition)

Jan 13 2022 Leadership is more than a being a leader. This textbook presents a holistic and readable overview of leadership. The dynamics of leadership involve leaders, followers and their environments — the organizational contexts within which leading and following take place. This triangle approach illustrates a more comprehensive view of leadership by focusing on all three dynamics. Students benefit from taking the evidence-based inventories to learn more about their leadership preferences. Six in-depth case studies add to the textbook and invite students to explore the application of leadership theory to practice. Each chapter ends with key terms, comprehension questions, and class activities. Chapters in this book draw on contemporary research and mini-cases to engage students in learning about themes of leadership focused on topics such as: ethics, effective communication, teams, mentoring, and toxic leadership. This book features integration of the case studies in the chapters along with updated literature and mini-cases. Chapter summaries, test banks, sample syllabi, and slide decks, designed by the authors, are a new addition for instructors.

Transnational Influences on Values and Practices in Nordic Educational Leadership

Jan 01 2021 This book explores to what extent transnational influences change national/local values and practices in the Nordic educational systems. It provides country cases and thematic chapters that give nuanced insights into the influence of transnational agencies on national governance and discourses. It describes how national discourses and regulation influences school leadership values, culture and practice, in competition with traditional values. The transnational and global discourse on educational leadership is mostly formed according to Anglo-American thinking and tradition. Pivotal foundations of this discourse are strong hierarchical societies/class societies with liberal democracies, and clearly streamed education systems. The Nordic discourse, however, builds on a more

equal society and flat hierarchies with participatory democracy, and on comprehensive schooling with strong local community roots. Leadership thinking and practices are formed by the culture and context they are part of: they are primarily shaped by the national/local values, traditions and practices, and only partially shaped by politics, discourses and literature. Due to the fact that a great deal of the literature that is being used in the Nordic contexts is of Anglo-American origin and many of the research projects have Anglo-American foundations, it is difficult to distinguish the sources for leadership thinking and practice. This book distinguishes the Nordic from the Anglo-American thinking and presents important findings and arguments for leadership practitioners inside as well as outside the Nordic countries.

The Elite Leadership Course Aug 20 2022 "This is a brilliant account of how leadership is made." - Andy McNab This is the true story of 21 young men desperately trying to survive the most brutal leadership course of modern times. A throw back to the Highland Fieldcraft Training Center, the revolutionary brain child of Lord Rowallan during the Second World War, this fascinating insight explains the extraordinary lengths Sandhurst goes to in pursuit of generating the world's greatest military leaders. No one could have known that the intensity of their training was coincidentally little more than a prelude to a decade of war in Afghanistan and Iraq where attrition rates became comparable to those reached during the Second World War. This captivating story is full of emotion brought on by physical and mental endeavor that leads to success and failure. This intimate and

revealing story of camaraderie is the first of its kind. But learning how to lead subordinates during the darkest of hours, living in the most austere of environments comes at a price. Unconventional and at times controversial, this is the only authentic account of life in Rowallan Company Sandhurst at a time when the world teetered on the brink of war with insurgents and dictators armed with weapons of mass destruction.

Leadership with a Conscience Apr 16 2022 Leaders and aspiring leaders are constantly searching for role models who are successful in placing leadership theory into effective practice. This book identifies ten such role models whose heroic leadership behavior is analyzed in order to reveal what particular abilities and skills made them successful and how those attributes can be applied to one's own leadership practice, whether that be as a classroom teacher, a principal or a superintendent of schools. They are juxtaposed with ten leaders who were effective, but certainly not heroic. Dr. Palestini points out that effective leaders have been utilizing the same leadership behavior for centuries. He uses this evidence to support the perennial and lasting impact of situational leadership theory which posits that no single way of leading works in all situations. Rather, appropriate leadership behavior depends on the circumstances at a given time. For decades effective managers have been diagnosing the situation, identifying the leadership style or behavior that will be most effective, and then determining whether they can implement the required style. The leadership behavior of ten heroic leaders ranging from Jane Addams to Warren Buffett, and from Abraham Lincoln to Joe Paterno is examined in this book. The lesson learned from these heroic leaders being that if one wishes to hone one's current leadership skills or become a future leader, one can learn to do so by reflectively looking to those who have established themselves in history as both effective and heroic leaders, that is, leaders who lead with both mind and conscience.

Real Leaders Don't Do PowerPoint Oct 18 2019 Think about the most powerful speech you've ever heard a leader give. What made that speech—and that speaker—memorable was likely a mix of authenticity, stage presence, masterful delivery, and—above all—an inspirational message. Nobody ever walked out of a great speech saying, "I loved the way she used PowerPoint." Yet, all too often, speakers rely on tools like it to carry them through a presentation. Real leaders speak to make a difference, to promote a vision, to change the way people think and feel and act. Their ability to lead goes hand in hand with their ability to get their message across, no matter what size audience they're addressing. Drawing on his years of experience in coaching executives, Christopher Witt shows not just how to make a speech but why and when you should make one. His practical advice on how to take your game to the next level includes: • You are the message. Who you are—your character, experience, values—shapes the message your listeners hear. • Content is king. Delivery is important, but it is only the helpful—or unhelpful—servant of your message. So build each speech around one, and only one, "Big Idea." • A confused mind always says no. When you want your listeners to say yes, you've got to make them understand what you want them to do and why they should care. • Dare to do the unexpected. Leaders know the rules, and they know when, why, and how to break them. In chapters that can be read in five minutes or less and in a book that can be gone through in one sitting, Witt shows you how to become more confident, more commanding, more compelling speakers. But this isn't just a book about speaking. It's about leadership and about how people—CEOs and PTA presidents, small business owners and sales reps, middle managers and techno geeks—can present themselves and their ideas with greater impact.

Unfortunately, too many professionals unconsciously still have faulty traditional assumptions that can get them, their teams, and their organizations in trouble. The author has researched the evolution of leadership and summarizes seven contemporary principles, twenty-six underlying leadership beliefs, and nine crucial practices of 21st Century Leadership. While too many leadership books focus on qualities, DePaul explains specific behaviors for practicing leadership. The second edition includes new research about leadership and

leadership development. With the pandemic, organizations have had to rely more on effective leadership to build high-performing teams, often at a distance. Training departments have had to radically update how they develop employees at all levels, and executive coaches have transitioned to virtual client support. With all these environmental changes as well as new social pressures on organizations to embrace diversity, equity, and inclusion, organizations need to change how they lead and avoid allowing their culture to develop by chance.
