Social Budgeting Dec 21 2019 A discussion of the improvement of social protection systems through effective financial planning, management and monitoring. While advocating the implementation and use of methodologically consistent and comprehensive statistical databases, this guide offers a set of established and pragmatic modelling techniques and explains how they can be used to better the governance of social protection systems.; Guidance to develop the required databases for financial planning draws on methodologies developed in the EU but also on analytical experience in many countries around the world. The work stress.

Psychodynamic Diagnostic Manual, Second Edition Jan 22 2020 Now completely revised (over 90% new), this is the authoritative diagnostic manual grounded in psychodynamic clinical models and theories. Explicitly oriented toward case formulation and treatment planning, PDM-2 offers practitioners an empirically based, clinically useful alternative or supplement to DSM and ICD categorical diagnoses. Leading international authorities systematically address personality functioning and psychological problems of infancy, childhood, adolescence, adulthood, and old age, including clear conceptualizations and illustrative case examples. Purchasers get access to a companion website where they can find additional case illustrations and download and print five reproducible PDM-derived rating scales in a convenient 8 1/2" x 11" size. New to This Edition *Significant revisions to all chapters, reflecting a decade of clinical, empirical, and methodological advances. *Chapter with extended case illustrations, including complete PDM profiles. *Separate section on older adults (the first classification system with a geriatric section). *Extensive treatment of psychotic conditions and the psychotic level of personality organization. *Greater attention to issues of culture and diversity, and to both the clinician's and patient's subjectivity. *Chapter on recommended assessment instruments, plus reproducible/downloadable diagnostic tools. *In-depth comparisons to DSM-5 and ICD-10-CM throughout. Sponsoring associations include the International Psychoanalytical Association, Division 39 of the American Psychological Association, the American Psychoanalytic Association, the International Association for Relational Psychoanalysis & Psychotherapy, the American Association for Psychoanalysis in Clinical Social Work, and five other organizations.

IFP/Los Angeles Independent Filmmaker's Manual, Second Edition Apr 17 2022 Backed by the resources of Independent Feature Project/West, co-authors Nicole Shay LaLoggia and Eden H. Wurmfeld have written the definitive low-budget production manual. Using examples from the Swingers and Kissing Jessica Stein, this comprehensive manual offers the independent filmmaker a single volume reference covering every aspect of making a film: script rights and rewrites, financing, breakdown, scheduling and budgeting, pre-production, production, postproduction, and distribution. A resource guide listing useful references and organizations, as well as a glossary, complete this guide. The downloadable resources feature interviews with important figures in the independent film industry, including Billy Bob Thornton and Ang Lee. Forms that are illuminated in the text are also included on the downloadable resources for ease of use. The new edition is updated with thorough coverage of digital and HD-how to decide which to shoot on, what the financial impact is, and the effect on preproduction. There is also a new chapter on distribution and expanded material on postproduction.

A Hebrew-English Reference Manual To The Hebrew Text Of The Old Testament. Based on the Leningrad Codex and Strong's Hebrew-English Lexicon Oct 23 2022 Intended for students and busy pastors, this book addresses the needs of readers struggling with any textual portion of Hebrew Old Testament scripture for a quick and handy reference. The word entries (the actual Hebrew Old Testament vocabulary) are directly taken from the Hebrew text of the Leningrad Codex and linked to the English word definitions and other essential information based on Strong's renowned Hebrew-English lexicon. To be used in conjunction with the Hebrew Old Testament (Tanakh) edition (ISBN 978-3-95935-372-4) and the Word Concordance of the Hebrew Old Testament (ISBN 978-3-95935-362-5) by the same editor.

Application and Theory of Petri Nets 2002 Jan 02 2021 This book constitutes the refereed proceedings of the 23rd International Conference on Application and Theory of Petri Nets, ICATPN 2002, held in Adelaide,

Australia, in June 2002. The 18 regular papers and one tool presentation presented together with six invited paper were carefully reviewed and selected from 45 submissions. All current issues on research and development of Petri nets are addressed, in particular concurrent systems analysis, model validation, business process management, reactive systems, workflow processes, wireless transaction protocols.

Applications and Theory of Petri Nets 2001 Aug 09 2021 This volume contains the proceedings of the 22nd International Conference on Application and Theory of Petri Nets. The aim of the Petri net conferences is to create a forum for discussing progress in the application and theory of Petri nets. Typically, the conferences have 100-150 participants { one third of these coming from industry while the rest are from universities and research institutions. The conferences always take place in the last week of June. This year the conference was organized jointly with the 2nd International Conference on Application of Concurrency to System Design (ICACSD 2001). The two conferences shared the invited lectures and the social program. The conference and a number of other activities are co-ordinated by a steering committee with the following members: G. Balbo (Italy), J. Billington (Australia), G. De Michelis (Italy), C. Girault (France), K. Jensen (Denmark), S. Magai (Japan), T. Murata (USA), C.A. Petri (Germany; honorary member), W. Reisig (Germany), G. Rozenberg (The Netherlands; chairman), and M. Silva (Spain). Other activities before and during the 2001 conference included tool demonstrations, a meeting on "XML Based Interchange Formats for Petri Nets", intensive introductory tutorials, two advanced tutorials on "Probabilistic Methods in Concurrency" and "Model Checking", and two workshops on "Synthesis of Concurrent Systems" and "Concurrency in Dependable Computing". The tutorial notes and workshop proceedings are not published in these proceedings, but copies are available from the organizers.

Revisiting the Medieval North of England Oct 31 2020 The medieval north of England has been underexplored to date, and this volume may be seen as an invitation for further exploration. It brings together scholars with shared interests in language, literature, culture, history and manuscript studies, viewed from different disciplinary perspectives such as English philology, historical linguistics and medieval literature. While many scholars have thus far been debating the dividing lines between north and south as well as between north, Midlands and south, the contributors to this volume are interested in texts produced in the north, the province of which has been determined by way of affiliation to religious and civic writing centres including the important monastic houses in the north (such as Durham, York and the Yorkshire Cistercian houses). Most of the contributions grow out of recent and ongoing research projects that touch upon different aspects of the north of England in the medieval period. Concentrating on the north as a centre of manuscript production, dissemination and reception, this volume aims also at illustrating the fluidity of boundaries and communication, and the resulting links to different geographical regions.

Parallel Problem Solving from Nature - PPSN VIII Jul 28 2020 This book constitutes the refereed proceedings of the 8th International Conference on Parallel Problem Solving from Nature, PPSN 2004, held in Birmingham, UK, in September 2004. The 119 revised full papers presented were carefully reviewed and selected from 358 submissions. The papers address all current issues in biologically inspired computing; they are organized in topical sections on theoretical and foundational issues, new algorithms, applications, multi-objective optimization, co-evolution, robotics and multi-agent systems, and learning classifier systems and data mining.

High Performance TCP/IP Networking Jul 08 2021 Written by best selling author, Raj Jain, and his authoritative co-author, this book features leading edge issues and solutions for high performance TCP/IP networking, this easy-to-read book provides a one-stop-shop for coverage of the many changes to the TCP protocol over the last two decades and all important research results. Professionals can keep themselves up-to-date with advances in this area and learn many potential performance problems and solutions for running TCP/IP in the emerging networking environment. An international expert in the field captures state of the art topics in each chapter in the five-part organization. Part I introduces the scope of the book, Part II provides detailed coverage of the tools and techniques for performance evaluation of TCP/IP networks, Part III examines the performance concepts and issues for running TCP/IP in the emerging network environment, Part IV discusses congestion control, and Part V explores the performance issues in implementing TCP/IP in the end system. For network engineers, R&D managers, research scientists, and network administrators.

The Turn of the Tide in the Pacific War Mar 04 2021 Midway through 1942, Japanese and Allied forces found themselves fighting on two fronts—in New Guinea and the Solomon Islands. These concurrent campaigns, conducted between July 1942 and February 1943, proved a critical turning point in the war being waged in the Pacific, as the advantage definitively shifted from the Japanese to the Americans. Key to this shift was the Allies seizing of the strategic initiative—a concept that Sean Judge examines in this book, particularly in the context of the Pacific War. The concept of strategic initiative, in this analysis, helps to explain why and how contending powers design campaigns and use military forces to alter the trajectory of war. Judge identifies five factors that come into play in capturing and maintaining the initiative: resources, intelligence, strategic acumen, combat effectiveness, and chance, all of which are affected by political will. His book uses the dual campaigns in New Guinea and the Solomon Islands as a case study in strategic initiative by reconstructing the organizations, decisions, and events that influenced the shift of initiative from one adversary to the other. Perhaps the most critical factor in this case is strategic acumen, without which the other advantages are easily squandered. Specifically, Judge details how General Douglas MacArthur and Admiral Chester Nimitz, in designing and executing these campaigns, provided the strategic leadership essential to reversing the tide of war—whose outcome, Judge contends, was not as inevitable as conventional wisdom tells us. The strategic initiative, once passed to American and Allied forces in the Pacific, would never be relinquished. In its explanation of how and why this happened, *The Turn of the Tide in the Pacific War* holds important lessons for students of military history and for future strategic leaders.

Intelligent Data Engineering and Automated Learning -- IDEAL 2010 Oct 11 2021 The IDEAL conference has become a unique, established and broad interdisciplinary forum for experts, researchers and practitioners in many fields to interact with each other and with leading academics and industries in the areas of machine learning, information processing, data mining, knowledge management, bio-informatics, neuro-informatics, bio-inspired models, agents and distributed systems, and hybrid systems. This volume contains the papers presented at the 11th International Conference on Intelligent Data Engineering and Automated Learning (IDEAL 2010), which was held September 1-3, 2010 in the University of the West of Scotland, on its Paisley campus, 15 kilometres from the city of Glasgow, Scotland. All submissions were strictly peer-reviewed by the Programme Committee and only the papers judged with sufficient quality and novelty were accepted and included in the proceedings. The IDEAL conferences continue to evolve and this year's conference was no exception. The conference papers cover a wide variety of topics which can be classified by technique, aim or application. The techniques include evolutionary algorithms, artificial neural networks, association rules,

probabilistic modelling, agent modelling, particle swarm optimization and kernel methods. The aims include regression, classification, clustering and generic data mining. The applications include biological information processing, text processing, physical systems control, video analysis and time series analysis.

VW Polo Petrol & Diesel Service & Repair Manual Feb 15 2022 Hatchback, including special/limited editions. Does NOT cover features specific to Dune models, or facelifted Polo range introduced June 2005. Petrol: 1.2 litre (1198cc) 3-cyl & 1.4 litre (1390cc, non-FSI) 4-cyl. Does NOT cover 1.4 litre FSI engines. Diesel: 1.4 litre (1422cc) 3-cyl & 1.9 litre (1896cc) 4-cyl, inc. PD TDI / turbo.

Logic for Programming, Artificial Intelligence, and Reasoning Apr 05 2021 This volume contains the research papers presented at the 17th International Conference on Logic for Programming, Artificial Intelligence, and Reasoning (LPAR-17), held in Yogyakarta, Indonesia, October 10-15, 2010, accompanied by the 8th International Workshop on the Implementation of Logic (IWIL-8, organized by Eugenia Ternovska, Stephan Schulz, and Georj Sutcliffe) and the 5th International Workshop on Analytic Proof Systems (APS-5, organized by Matthias Baaz and Christian Fermüller). The call for papers attracted 133 abstract submissions of which 105 materialized into full submissions, each of which was assigned for reviewing to at least three Program Committee members; 41 papers were accepted after intense discussions. Once more the EasyChair system provided an ideal platform for submission, reviewing, discussions, and collecting final versions of accepted papers. The program included three invited talks by Krishnendu Chatterjee, Joseph Halpern, and Michael Maher, as well as an invited tutorial by Norbert Preining. They are documented by the corresponding papers and abstract, respectively, in these proceedings, which this year appear for the first time in the ARCoSS subline of the Lecture Notes in Computer Science.

Zoonoses Jun 07 2021 Zoonoses are a persistent threat to the global human health Today, more than 200 diseases occurring in humans and animals are known to be mutually transmitted. Classical infectious diseases, such as rabies, plague, and yellow fever, have not been eradicated despite major efforts. New zoonotic diseases are on the increase due global conditions such as overpopulation, wars, and food scarcity, which facilitate human contact with rodents, stray animals, and their parasites. In addition, humans are unwittingly becoming accidental hosts and new links in an infectious chain by engaging in activities such as survival training, which involves camping in open areas and consumption of raw or insufficiently cooked food. Zoonotic infections cause a variety of symptoms that often do not provide clear evidence of a known disease. Zoonoses, Fourth Edition, describes most occurring worldwide zoonosis and facilitates the identification, diagnosis and treatment of zoonotic infections. Written by a team of doctors, medical microbiologists and veterinarians, this completely revised edition covers all aspects of the epidemiology and prevention of zoonotic diseases through clear descriptions of various illnesses. Specifically, this fourth edition covers zoonosis caused by viruses, bacteria, fungi and parasites infections caused by animal bites infections and intoxications by animal foods Iatrogenic transmission of zoonotic pathogens Zoonoses is an indispensable reference for clinicians and laboratorians.

Shall We Play the Festschrift Game? Feb 21 2020 There are not many people who can be said to have influenced and impressed researchers in so many disparate areas and language-geographic fields as Lauri Carlson, as is evidenced in the present Festschrift. His insight and acute linguistic sensitivity and linguistic rationality have spawned findings and research work in many areas, from non-standard etymology to hardcore formal linguistics, not forgetting computational areas such as parsing, terminological databases, and, last but not least, machine translation. In addition to his renowned and widely acknowledged insights in tense and aspect and its relationship with nominal quantification, and his ground-breaking work in dialog using game-theoretic machinery, Lauri has in the last fifteen years as Professor of Language Theory and Translation Technology contributed immensely to areas such as translation, terminology and general applications of computational linguistics. The three editors of the present volume have successfully performed doctoral studies under Lauri's supervision, and wish with this volume to pay tribute to his supervision and to his influence in matters associated with research and scientific, linguistic and philosophical inquiry, as well as to his humanity and friendship.

Total Resistance Feb 03 2021 This is a legendary work by the famed Swiss expert on guerrilla warfare, Major H. von Dach. Survivalists have rediscovered this important study on resistance and underground operations, some making it the keystone of their libraries. Well-written and illustrated with easy-to-understand drawings, Total Resistance analyzes and overviews the techniques needed to overcome an invading force, formation of guerrilla units, weapons, food and medical considerations, ambushes, sabotage and much more.

Making Personas Mar 24 2020 The film star is not simply an actor but a historical phenomenon that derives from the production of an actor's attractiveness, the circulation of his or her name and likeness, and the support of media consumers. This book analyzes the establishment and transformation of the transnational film star system and the formations of historically important film stars—Japanese and non-Japanese—and casts new light on Japanese modernity as it unfolded between the 1910s and 1930s. Hideaki Fujiki illustrates how film stardom and the star system emerged and evolved, touching on such facets as the production, representation, circulation, and reception of performers' images in films and other media. Examining several individual performers—particularly benshi narrators, Onoe Matsunosuke, Tachibana Teijirō, Kurishima Sumiko, Clara Bow, and Natsukawa Shizue—as well as certain aspects of different star systems that bolstered individual stardom, this study foregrounds the associations of contradictory, multivalent social factors that constituted modernity in Japan, such as industrialization, capitalism, colonialism, nationalism, and consumerism. Through its nuanced treatment of the production and consumption of film stars, this book shows that modernity is not a simple concept, but an intricate, contested, and paradoxical nexus of diverse social elements emerging in their historical contexts.
