'It's a really great book: friendly, comprehensive, complete and up-to-date. It is an explanatory guide to help you judge and choose the contraception to use. I recommend the book highly.' Dr Cindy Pan, general practitioner, media broadcaster and author of Pandora's Box. Choosing a method of contraception isn't simply about preventing pregnancy. It's also about making the best choice for your future, your lifestyle, your health and your peace of mind. This updated edition of Contraception-Healthy Choices provides both women and men with information to help make that choice. Forms of contraception covered include condoms (male and female), progestogen-only injections, implants, diaphragms, cervical caps, intrauterine devices (IUDs), natural family planning, traditional methods and sterilisation. The book also includes an update on the contraceptive pill, a new chapter on the increasingly popular vaginal ring, and new information on emergency contraception. There is information on how pregnancy happens, reducing the incidence of sexually transmissible infections and abortion. Written in an easy-to-read Q&A format and illustrated throughout, Contraception-Healthy Choices is a practical and contemporary guide for people who want to make a contraception they use. Our proven Spectrum Science grade 7 workbook features 176 pages of fundamentals in science learning. Developed to current national science standards, covering all aspects of seventh grade science education. This workbook for children ages 12 to 13 includes exercises that reinforce science skills across the different science areas. Science skills include: • Scientific Tools • Chemical vs. Physical Change • Ecosystems • Rock Cycle • Biotechnology • Natural Hazards • Science History Our best-selling Spectrum Science series features age-appropriate workbooks for grade 3 to grade 8. Developed with the latest standards-based teaching methods that provide targeted practice in science fundamentals to ensure successful learning! Science certainly does not need to be complicated formulas, heavy text books and geeky guys in white lab coats with thick glasses. Science can be really simple and is actually only about understanding the world you live in! Science experiments are an awesome part of science that allows you to engage in cool and exciting hands on learning experiences that you are sure to enjoy and remember! By working through the science projects in this book, you will learn about science in the best possible way – getting your hands dirty & doing things yourself! Specially chosen to appeal to kids in grade 7, each experiment answers a particular question about a specific category of science and includes an introduction, list of the materials you need, easy-to-follow steps, an explanation of what the experiment demonstrates as well as a learn more and science glossary section! Each of these easy-to-understand sections helps explain the underlying scientific concepts to kids and will inspire them to create their own related experiments and aid in developing an inquisitive mind. Amongst many others, you will use iodine to test for the presence of starch in foods to understand how chemical analysis works, make a 'Berlese' funnel to catch soil-burrowing insects, make a depth indicator similar to the gauges used on ships, and make an electrical light bulb to learn about the resistance in electrical conduits! Other fun experiments include using chromatography to predict the 'fall' colour of a green leaf tree, make your own barometer to measure the air pressure and predict the weather, study what effect high or low temperatures have on a magnet, build your own rain alarm and many, many more! The 40 projects contained in this science experiment e-book cover a wide range of scientific topics; from Chemistry and Electricity to Life Sciences and Physics... there are even experiments on earth science, astronomy and geology all designed for young students in grade 7! With this book, you are sure to find a project that interests you. When you are interested in a certain science topic, you will have more fun, and learn more, too! Designed with safety in mind, most of the items you will need for the experiments, such as jars, aluminium foil, scissors and sticky tape, you can find around your home. Others, such as magnets, lenses or a compass, you will be able to buy quite cheaply at a hobby shop or hardware store.
