Shaping the Futures of Work Apr 12 2022 The widespread belief that tech-savvy, educated millennials are well positioned to handle the challenges of the fourth industrial revolution is unfounded. It does not fully grasp the reality of a flux society, where relevant technological skills and knowledge are continuously changing: no one is permanently tech-savvy. Millennials, like other generations, face the challenge of needing to continually reskill. This has compounded their struggle to begin their careers at a point when there is no longer any guarantee of lifetime employment or retirement at a set age. *Shaping the Futures of Work* is a timely sociological exploration of the impact of technological innovations on employment. Nilanjan Raghunath proposes that stakeholders such as states, enterprises, and citizens hold equally important roles in ensuring that people can adapt, innovate, and thrive within conditions of flux. A promising model focuses on collaboration and proactive governance. While good governance includes citizen engagement, proactive governance goes one step further, creating inclusive policies, roadmaps, and infrastructure for social and economic progress. This book reveals that lifelong learning and adaptability are imperative, even for well-educated professionals. Using Singapore and Singaporean millennials as a case study, Raghunath examines proactive governance and delivers research and analysis to elucidate career trajectories, pointing to a work ethic that aims to engage with technological futures. Looking at local and global sociological literature to confirm the need for proactive governance, *Shaping the Futures of Work* suggests that Singaporean millennials – and professionals around the world – need to better prepare themselves for flux, risk, failure, and reinvention for career mobility.

David Vizard's How to Port and Flow Test Cylinder Heads Jan 21 2023 Porting heads is an art and science. It takes a craftsman's touch to shape the surfaces of the head for the optimal flow characteristics and the best performance. Porting demands the right tools, skills, and application of knowledge. Few other engine builders have the same level of knowledge and skill porting engine heads as David Vizard. All the aspects of porting stock as well as aftermarket heads in aluminum and cast-iron constructions are covered. Vizard goes into great depth and detail on porting aftermarket heads. Starting with the basic techniques up to more advanced techniques, you are shown how to port iron and aluminum heads as well as benefits of hand and CNC porting. You are also shown how to build a high-quality flow bench at home so you can test your work and obtain professional results. Vizard shows how to optimize flow paths through the heads, past the valves, and into the combustion chamber. The book covers blending the bowls, a basic porting procedure, and also covers pocket porting, porting the intake runners, and many advanced procedures. These advanced procedures include unshrouding valves, porting a shortside turn from the floor of the port down toward the valve seat, and developing the ideal port area and angle. All of these changes combine to produce optimal flow velocity through the engine for maximum power.

Design Thinking Aug 04 2021 The present world is service oriented. Without a proper structure, no system can work, and services cannot be rendered successful. Moreover, for the proper structure, the practice of design thinking is the perfect answer. Design thinking is not a newly emerged concept and remains rooted in society for a very long time. The concept of design thinking is useful for designing and understanding context relating to any businesses. Design thinking may seem vague and a capable subject for all; however, the same is not true and requires thorough planning. If general reports are to be taken, design thinking has five stages, and each stage has its importance. Design thinking brings out the creativity of a person, and the scope of the same has widened in the modern day, where one encounters various problems even in day-to-day activities. Design thinking is a way to attain success and is an essential factor of development and growth.

Fire in the Straw Mar 31 2021 **Named One of the New York Post's Best New Books to Read ** FIRE IN THE STRAW is the witty and deeply felt memoir of Nick Lyons, a man with an intrepid desire to reinvent himself—which he does, over and over. Nick Lyons shape shifts from reluctant student and graduate of the Wharton School, to English Professor, to husband of a fiercely committed painter, to ghost writer, to famous fly fisherman and award-winning author, to father and then grandfather, to Executive Editor at a large book publishing company, and finally to founder and publisher of his own successful independent press.. Written with the same warm and earthy voice that has enthralled tens of thousands of fly-fishing readers, Nick weaves the disparate chapters of his life: from the moment his widowed mother drops him off at a grim boarding school at the age of five, where he spends three lonely and confusing years; to his love of basketball and pride playing for Penn; to the tumultuous period, in the army and after, when he found and was transformed by literature; to his marriage to Mari, his great love and anchor of his life. Suddenly, with a PhD in hand and four children, Nick embarks on a complex and thrilling ride, juggling family, fishing, teaching, writing, and publishing, the wolf always at his door. Against all odds, The Lyons Press survives, his children prosper, his wife's art flourishes, and his books and articles make him a household name. *Fire in the Straw* is a love story, a confessional, and a beautiful big-hearted memoir.

Practical Methods for Analysis and Design of HV Installation Grounding Systems May 01 2021 Practical Methods for Analysis and Design of HV Installation Grounding Systems gives readers a basic understanding of the modeling characteristics of the major components of a complex grounding system. One by one, the author develops and analyzes each component as a standalone element, but then puts them together, considering their mutual disposition, or so-called proximity effect. This is the first book to enable the making and analysis of the most complex grounding systems that are typical for HV substations located in urban areas that uses relatively simple mathematical operations instead of modern computers. Since the presented methods enable problem-solving for more complex issues than the ones solved using National, IEC and/or IEEE standards, this book can be considered as an appendix to these standards. Develops general equations of lumped parameter ladder circuits Includes the analytical expression for determination of ground fault current distribution for a fault anywhere along a cable line Presents measurement and analytical methods for the determination of actual ground fault current distribution for high-voltage substations located in urban areas Provides the analytical procedure for the determination of the critical ground fault position for faults appearing in outgoing transmission lines Defines testing procedure for the correct evaluation of grounding systems of substations located in urban areas

Talking to GOATs Jul 23 2020 INSTANT USA TODAY BESTSELLER! WITH A FOREWORD BY TOM BRADY "As a sportscaster and sports historian, Jim's career genuinely stands the test of time. . . . This book is sports history about some of the greats by one of the greats, who was taking it all in on the sidelines, in the stands or the dugout, by the eighteenth green, courtside, or in the broadcast booth." —Tom Brady, seven-time NFL Super Bowl champion GOAT A riveting, insightful memoir of never-before-told stories from Jim Gray, twelve-time Emmy Award-winner, Hall of Fame sports broadcaster, and renowned interviewer— that explores the author's career and the inside stories and memorable moments of the famous legends he has covered including, Muhammad Ali, Tom Brady, Kobe Bryant, LeBron James, Michael Jordan and Mike Tyson. In *Talking to GOATs*, award-winning broadcaster Jim Gray looks back at his four decades of sports reporting from the unparalleled perspective of one of the world's most respected and skilled interviewers. A journalist who many iconic athletes have trusted to tell their stories (of both triumph and disgrace), Jim has had unprecedented access to the people, places and extraordinary events in the world of sports. Asking tough but fair questions, he has broken numerous stories, and landed squarely in the middle of others, from the Ben Johnson and Barry Bonds steroid scandals, to Michael Jordan's surprise retirement, to the off-the-court Kobe/Shaq feud which led to their on-the-court break up, to being part of the live broadcast for twenty-two Super Bowls. He's climbed into the ring to interview Mike Tyson after he bit off a chunk of Evander Holyfield's ear, and stood next to Ron Artest when the "Malice at the Palace" melee erupted, and was on site at the bombing of the Atlanta Olympics. Anyone who has watched Jim effortlessly engage his subjects at the precise moment of triumph or tragedy has little idea what it takes to secure the interview, or what actually happens when the camera cuts away. These are real, mesmerizing, and previously untold stories. *Talking to GOATs* features numerous world-class athletes, including Muhammad Ali, Tom Brady, Kobe Bryant, LeBron James, Michael Jordan, Floyd Mayweather, Michael Phelps, Mike Tyson and Tiger Woods, and world leaders George W. Bush, Barack Obama, Mikhail Gorbachev, and many more. On each page, Jim gives the reader a coveted all-access pass as he reviews the best interviews, the best athletes, and the best games in modern sports history. It's like a personal introduction to the characters and careers of these heroes and villains we've known since childhood. He examines how money, celebrity, the media, and power interact, and how sports, more than any other institution, has led to momentous transformations in American society.
