This book combines teaching-informed research studies and research-informed teaching accounts which explore English language education that engages with (a)gender and (a)sexual diversity. Informed by critical theories, critical literacy, post-structuralism, queer theory, and indigeneity/(de)coloniality, the

critical perspectives in this volume consider gender and sexuality as dimensions of human life and aim to promote sexual, gender, emotional and relational wellbeing together with the construction of cultural horizons and citizenship. The chapters are organised around three interdependent areas of inquiry: 1) how educators design pedagogies and curriculums around gender diversity and sexuality, 2) how students and teachers navigate issues of gender diversity and sexuality in practice, as well as 3) how issues of gender diversity and sexuality are (not) addressed in the materials for teaching and learning English. The contributors are all teacher educators-researchers and therefore have vast experience in enacting, implementing, designing, and examining the field of English language teacher education from/for the classroom with a gender perspective in diverse settings, with chapters come from Argentina, Bangladesh, Canada, Germany, Norway, Poland, Saudi Arabia, South Africa, Spain, Taiwan, Turkey, the UK and Uruguay. This is the first book-length study of the award-winning historical drama The Tudors. In this volume twenty distinguished scholars separate documented history, plausible invention, and outright fantasy in a lively series of scholarly, but accessible and engaging essays. The contributors explore topics including Henry VIII, Catherine of Aragon, Anne Boleyn, his other wives and family, gender and sex, kingship, the court, religion, and entertainments. The first goal is to explore the difference between fairness and justice in language assessment. The authors distinguish internal and external dimensions of the equitable and just treatment of individuals taking language tests which are used as gatekeeping devices to determine access to education and employment, immigrant status, citizenship, and

other rights. The second goal is to show how the extent of test fairness can be demonstrated and improved using the tools of psychometrics, in particular the models collectively known as Rasch measurement. "This book will have an enormous impact on the field of language assessment. Using Rasch analysis models to explore and identify sources of unfairness, the authors make a compelling case for fairness in the design and implementation of language assessment instruments and for justice in the interpretation and use of test results. A real strength of the book is that it guides readers through analytical techniques in an accessible way." Dan Douglas, Professor Emeritus, Applied Linguistics Program, Iowa State University.

TESOL Teacher Education in a Transnational World critically examines theories and practices in contemporary TESOL teacher education to shed new light on the intersection of transnationalism and language teacher education. It emphasizes the scholarship of transnational mobility of language teachers, and showcases critical research from diverse contexts. The book fills a critical research gap by more fully examining the theory and practice of teacher education in a changing time when national identities and cross-border mobilities continue to figure prominently in scholarly discussions. Through a diverse set of epistemological, historical and theoretical perspectives along with methodological innovations, contributors of this volume not only index the dynamism of the scholarship of teacher education, but they also offer new forums for lively pedagogical debates. Featuring contributions from diverse educational and geographical contexts, including Europe, Asia, North America, and Latin America, the book moves the existing scholarship forward to more fully examine TESOL teacher education in relation to transnationalism. This book will be of great interest to academics, scholars, post-graduate students, teacher educators, policymakers, curriculum specialists, administrators, and other stakeholders interested in language teacher education, TESOL and applied linguistics This is a comprehensive sourcebook on the world's most famous vampire, with more than 700 citations of domestic and international Dracula films, television programs, documentaries, adult features, animated works, and video games, as well as nearly a thousand comic books and stage adaptations. and Dracula himself, or a recognizable vampiric semblance of Dracula, appears in each. The book includes contributions from Dacre Stoker, David J. Skal, Laura Helen Marks, Dodd Alley, Mitch Frye, Ian Holt, Robert Eighteen-Bisang, and J. Gordon Melton. Promoting China's cultural soft power by disseminating modern Chinese values is one of the policies of President Xi Jinping. Although, it is usually understood as a top-down initiative, implemented willingly or unwillingly by writers, filmmakers, artists, and so on, and often manifesting itself in clumsy and awkward ways, for example, the concept of "the Chinese dream," intended to rival and perhaps appeal more strongly than "the American dream," modern Chinese values are in fact put forward in many ways by many different cultural actors. Through analyses of film festivals, CCTV, Confucius Institutes, auteurs, blockbusters, reality TV, and online digital cultures, this book exposes the limitations of China's officially promoted soft power in both conception and practice, and proposes a pluralistic approach to understanding Chinese soft power in local, regional, and transnational contexts. As such, the book demonstrates the limitations of existing theories of soft power, and argues that the US-derived concept of soft power can benefit from being examined from a China perspective. www.TheBookOfTheAnimals.com**REVIEW**"The Book of the Animals is a planned series of illustrated books for young children. [...] These delightful books tell the story of what happens when the animals in the stories, like many young children, don't want to eat and don't want to wash...The books are very suitable both for reading to young children and for older children to use to learn to read in both languages. They might even persuade them to wash and eat their dinner!The repetitive structure is supportive of children learning new words and the illustrations work well alongside the text to help understanding of unfamiliar words.I can easily imagine young children demanding repeat readings and enjoying learning the text by heart as many children do with favourite stories. Children learning to make up and write their own stories might well want to write a personalised version, using the structure as a prop.I think the stories would work well both in the home and in the classroom."(Review published in The Cass School of Education, by Dr Raymonde Sneddon, Research Fellow for "The Cass School of Education" at the University of East London, and Honorary Research Fellow of Birkbeck College, in the Department of Applied Linguistics)**SUPPORT**'The Book of The Animals' series is supported & recommended by ABRIR UK, a Brazilian Association for Educational Projects in the United
