Math Is Bad Jul 02 2021 "MATH IS BAD" tries to encounter mathematics and reality in a face to face battle. In the presented book, we can see the great contribution mathematics made to the advancement of our knowledge about nature. However, the modern era reveals another side of truth which cannot be formulated by mathematics. That is, nothing is for sure. This vision has led to another branch of science, which requires relying on probabilistic effects. Statistics is the branch that employs mathematics while missing the absoluteness of math. In simple terms, "MATH IS BAD" encourages us to listen to the sound of cosmos and whatever it contains with no sense of absoluteness, while respecting its complexity and randomness.

Three Loves Mar 10 2022 Three Loves is a brief look at the three kinds of love involved in dating, courtship, and marriage. C.S. Lewis, in his book, The Four Loves, proposes that there are four kinds of love based on classical Greek. However, only two of his Greek words for love are found in the Bible. For the purpose of looking at the love between a man and a woman, it makes sense to look at three kinds of love—romantic, committed, and sexual.

Working Sep 23 2020 "One of the great reporters of our time and probably the greatest biographer." —The Sunday Times (London) From the two-time Pulitzer Prize-winning author of The Power Broker and The Years of Lyndon Johnson: an unprecedented gathering of vivid, candid, deeply moving recollections about his experiences researching and writing his acclaimed books. Now in paperback, Robert Caro gives us a glimpse into

his own life and work in these evocatively written, personal pieces. He describes what it was like to interview the mighty Robert Moses and to begin discovering the extent of the political power Moses wielded; the combination of discouragement and exhilaration he felt confronting the vast holdings of the Lyndon B. Johnson Library in Austin, Texas; his encounters with witnesses, including longtime residents wrenchingly displaced by the construction of Moses' Cross-Bronx Expressway and Lady Bird Johnson acknowledging the beauty and influence of one of LBJ's mistresses. He gratefully remembers how, after years of working in solitude, he found a writers' community at the New York Public Library, and details the ways he goes about planning and composing his books. Caro recalls the moments at which he came to understand that he wanted to write not just about the men who wielded power but about the people and the politics that were shaped by that power. And he talks about the importance to him of the writing itself, of how he tries to infuse it with a sense of place and mood to bring characters and situations to life on the page. Taken together, these reminiscences--some previously published, some written expressly for this book--bring into focus the passion, the wry self-deprecation, and the integrity with which this brilliant historian has always approached his work.

Copyright Law and a Brief Look at the Google Library Project Jan 20 2023 The Google Book Search Library Project, announced in December 2004, raised important questions about infringing reproduction and fair use under copyright law. Google planned to digitise, index, and display "snippets" of print books in the collections of five major libraries without the permission of the books' copyright holders, if any. This book examines the important issues that were raised by the outcome of the Google Library Project, and analyse possible future cases which may raise similar questions about infringing reproduction and fair use. The authors also discuss hyperlinking, in-line linking, caching, framing and thumbnails and how they relate to a copyright holder's traditional rights to control reproduction, display, and distribution of protected works. This book consists of public documents which have been located, gathered, combined, reformatted, and enhanced with a subject index, selectively edited and bound to provide easy access.

Islam: A Brief Look at Faith and History (Revised Edition) Sep 04 2021 Paperback. Islam has influenced and continues to influence many cultures around the globe. It is shaping history, cultures and civilizations. Sadly, most of us only receive a two-dimensional look at Islam? a view that is often distorted by the brevity of the media sound-bites or by opinionated agendas. Our intention with this book is to present Islam, its teachings and the history of those who follow it. It is not a comprehensive study? nor should it be seen as definitive. Rather, it should be used as a stimulus for further detailed study. We hope and pray that this effort becomes a source of promoting (much needed) harmony, peace, tolerance, and coexistence in the human family. This can be done through school education systems, interfaith sessions, mosque open houses, educational seminars and individual readership. This new Revised Edition has larger text, clearer graphics and many new additions to the previous text.
